office of public school construction

# Annual Report

state of california • department of general services

# Letter from the Interim Executive Officer

The past fiscal year has been an exciting and successful one for the Office of Public School Construction (OPSC). The OPSC staff continued processing a tremendous amount of School Facility Program (SFP) applications each month, averaging nearly 400 applications for both new construction and modernization. We processed over \$53 million a month in funding applications for new construction, and for modernization applications nearly \$128 million per month. Workload accomplishments over the last 18 months included the allocation of a staggering \$4.2 billion in State matching funds to school districts for new construction and modernization projects. This funding will assist school districts in meeting California's growing needs for adequate school facilities by housing over 92,000 children in new classrooms and modernizing older classrooms for more than 836,956 children.

However, Modernization funding was severely impacted last year under the SFP. In May 1999, six months after the passage of Proposition 1A, the first funding cycle for modernization was exhausted, providing funding to nearly 900 school projects. The OPSC was directed by the State Allocation Board (SAB) to continue processing "unfunded" modernization applications until the next funding cycle that would be available July 2000. The second funding cycle included \$1.3 billion for modernization projects and was apportioned at the July 5, 2000 SAB meeting, providing funding for over 930 schools. Funding for new construction projects is still available today and, based on current application activity, is expected to continue to be available for new construction projects filed within the next two years.

Another indicator of our success is the results of our annual Customer Satisfaction Survey which, for a second year in row, reached unprecedented approval ratings from our customers. A 97 percent customer satisfaction rating could not have been accomplished without the dedication from the OPSC management and staff in serving our customers needs. We are pleased with the results and will continue to find ways to sustain this rating if not surpass it!

Beginning the first of the year, the OPSC initiated a Small School District Outreach Program to provide these districts with individual assistance in completing their applications in the various programs administered by the OPSC. This new outreach program has been very successful.

Further staff accomplishments this fiscal year include our efforts to automate the SFP. At this time, the OPSC has completed automation of two components of the SFP application and approval process. This program, known as the Board Item Generator (BIG) has allowed the OPSC

project managers to create a computerized funding item that can be presented to the SAB for approval. This system will assist our staff in processing funding requests more efficiently.

In addition, the OPSC released in the early part of 2000 the SFP Guidebook and the Cost Reduction Guidebook. Both guidebooks were developed to provide our customers with the resources and tools to assist them in successfully building or modernizing school facilities. These documents as well as other program information, such as regulations and forms, are available to our customers on a CD-ROM, "Greatest Bytes Volume I", that was made available in the 1999-2000 Fiscal Year to supplement our Web site.

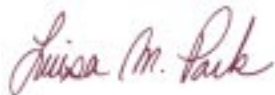

Other programs administered by the OPSC, the Deferred Maintenance Program (DMP) and State Relocatable Classroom Program have also achieved noteworthy results. The OPSC apportioned over \$179 million to school districts under the DMP on a matching basis for the assistance of major repair or replacement of existing school building components. In September 1999, the OPSC purchased 500 new portable classrooms to assist school districts that have been impacted by excessive enrollment growth.

Moving into the 2000/2001 Fiscal Year, the OPSC will continue to concentrate on providing responsive and highly qualified customer service. The OPSC management has targeted several service areas that it hopes will continue meeting our commitment:

- enhancing the automated programs that processes most activities for the SFP;
- continuing to search for additional ways to improve the application processes for all programs under the auspices of the SAB and the OPSC;
- continuing to work toward the development of electronic filing of program applications and develop interactive transfer of data between the OPSC and its customers;
- continuing the increased scheduling of regional meetings and workshops for client districts.

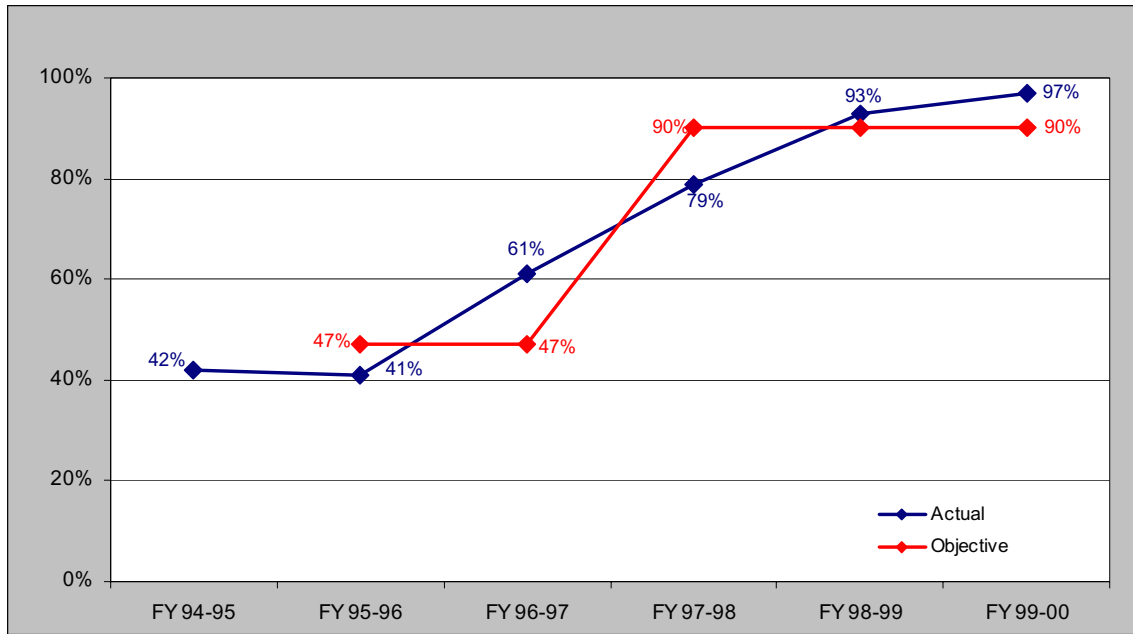

Although we have set ambitious objectives for the OPSC, we believe they are attainable and will enable us to begin the new Fiscal Year with a reaffirmation of our commitment to each of our stakeholders. Again, thanks to the OPSC staff, the Governor, other governmental agencies, members of the Legislature, the Department of General Services, and school funding advocates who have assisted in making this program a success.

Sincerely,

LUISA M. PARK, Interim Executive Officer  
Office of Public School Construction and the State Allocation Board

# About the Office of Public School Construction

## **Mission Statement**

As staff to the State Allocation Board (SAB), the OPSC facilitates the processing of school applications and makes funding available to qualifying school districts. These actions enable school districts to modernize and build safe and adequate school facilities for their children in an expeditious and cost-effective manner.

## **The Office of Public School Construction's (OPSC) Role**

The OPSC is responsible for providing the staff assistance necessary to carry out the law, regulations, policies and programs of the SAB. Allocations for various public school construction projects result in safe and comfortable classrooms for California's K-12 children.

The primary function of the OPSC is to administer the monetary resources which are available to the SAB from various sources. In fulfilling its responsibility, the SAB is called upon to make funding apportionments. Upon passage of Proposition 1A in November of 1998 and Senate Bill 50 (Greene) chaptered in August of 1998, the OPSC, under the direction of the SAB filed emergency regulations with the Secretary of State for the new School Facility Program and began apportioning funds by December 1998. The OPSC also advises and makes recommendations regarding the use of bond funds for consideration by the SAB.

In addition to carrying out the mandates of the SAB, the OPSC is called upon to design and develop efficient policies and apportionment processes for the approval of the SAB. At the direction of the SAB, OPSC staff processes applications, prepares and distributes handbooks and other informational materials to assist school districts with the application processes for different programs. The OPSC also prepares regulations, tracks school facilities legislation, performs on-site inspections and conducts or participates in training and other school facilities seminars — all in an effort to simplify the programs and ensure that as many school housing needs as possible are met. The OPSC makes a wide variety of information relating to the programs it administers available on the Internet at: <http://www.opsc.dgs.ca.gov>.

The OPSC has also provided a CD-ROM to our customers that includes regulations, guide-books and forms for the programs administered by the OPSC.

## State Allocation Board Meetings

The Executive Officer of the SAB is also the Executive Officer for the OPSC. This person is appointed by and serves at the pleasure of the Governor. A Deputy Executive Officer of the OPSC is appointed by the Executive Officer to serve the OPSC. An Assistant Executive Officer is appointed by the SAB and serves at the pleasure of the SAB.

### **Luisa M. Park**

Interim Executive Officer, State Allocation Board/OPSC

### **Bruce B. Hancock**

Assistant Executive Officer, State Allocation Board

Generally, the SAB meets every fourth Wednesday of the month. This meeting is the principal monthly meeting of the SAB, wherein its membership is called upon to make funding allocations for construction, modernization and deferred maintenance funds. The SAB must also make decisions regarding contested staff recommendations, issues requiring considerable review and discussion, regulations or policies, as well as items that require the action or approval of the SAB prior to enactment by the OPSC. The SAB may call a meeting for other days of the month. All SAB meetings are open to the public and are often attended by large groups of people who are interested in specific issues.

## State Allocation Board

The State Allocation Board (SAB) is comprised of the Director of Finance (the chairperson), the Director of the Department of General Services, the Superintendent of Public Instruction, two members of the Senate and two members of the Assembly.

## SAB Membership

### **Dede Alpert**

Senator, Thirty-Ninth District

---

### **Jack O'Connell**

Senator, Eighteenth District

---

### **Marco Antonio Firebaugh**

Assembly Member, Fiftieth District

---

### **Darrell Steinberg**

Assembly Member, Ninth District

---

### **B. Timothy Gage**

Director, Department of Finance

(Annette Porini serves as designated representative)

---

### **Barry D. Keene**

Director, Department of General Services

(Karen McGagin serves as designated representative)

---

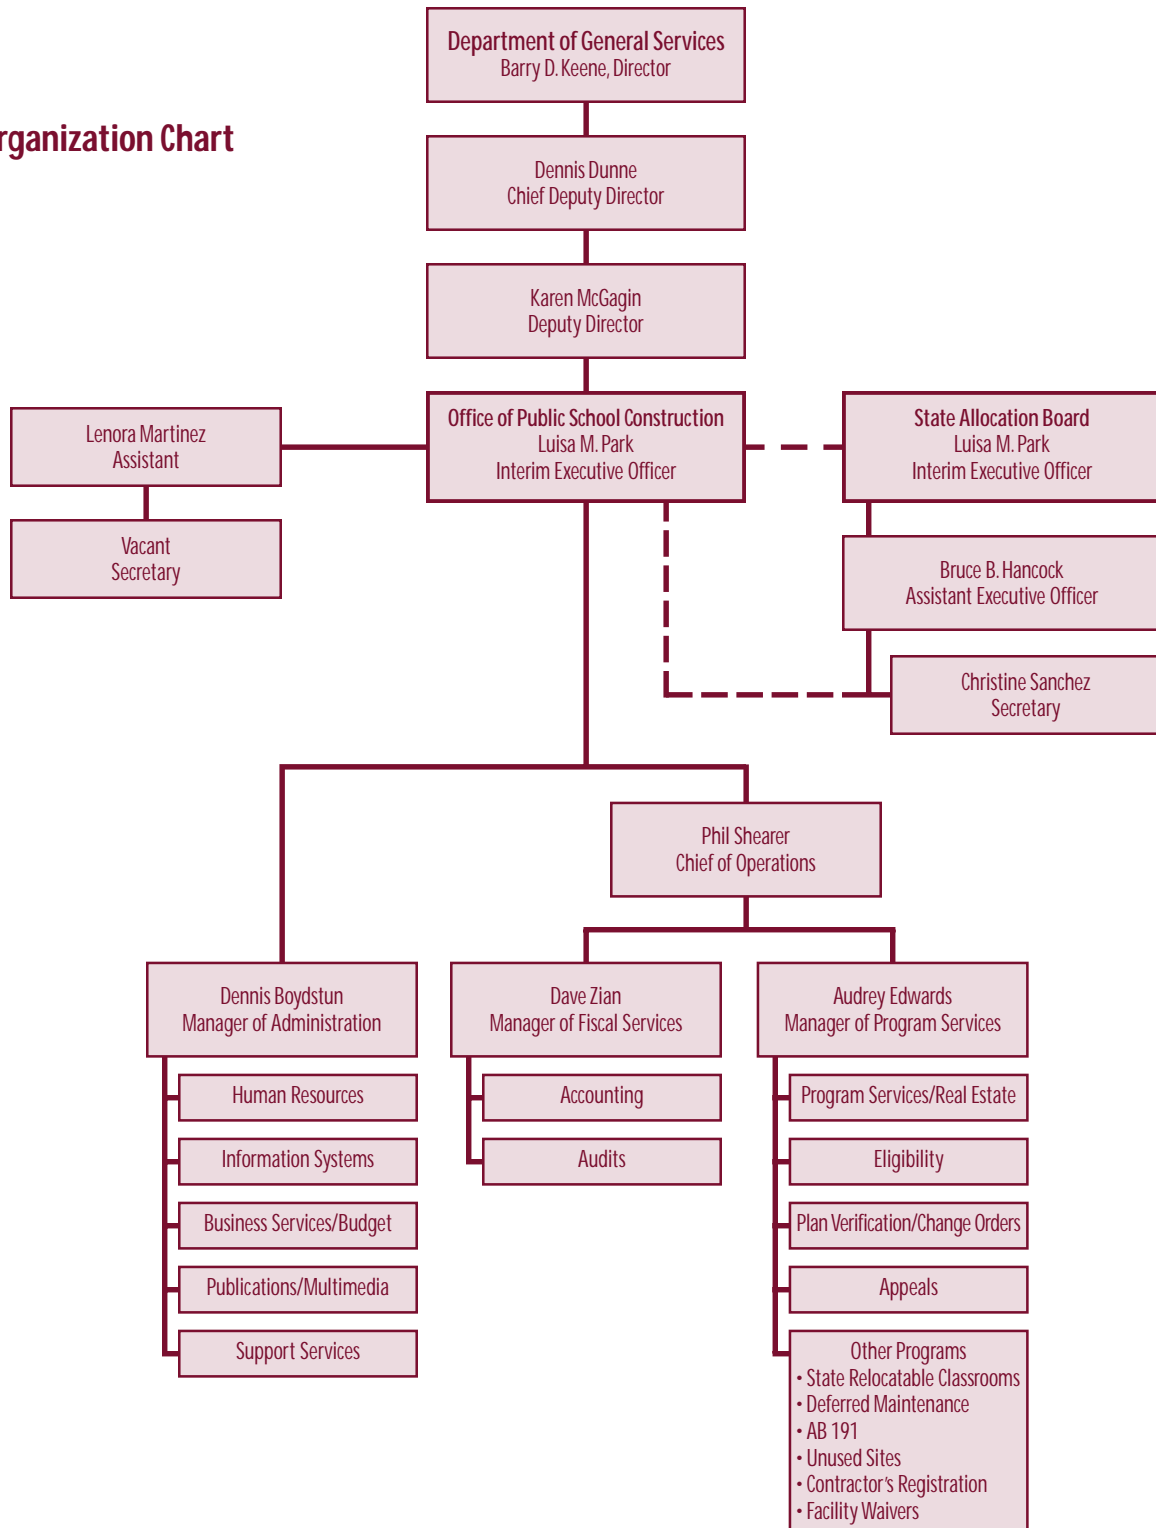

### **Delaine Eastin**

State Superintendent of Public Instruction, Department of Education

(Duwayne Brooks serves as designated representative)

---

## Organization Chart

# Programs Administered by OPSC

## **School Facility Program**

Chapter 407, Statutes of 1998, Senate Bill (SB) 50 (Greene), was chaptered and became law on August 27, 1998. This legislation established the new School Facility Program (SFP) for new construction and modernization of K-12 public school facilities. This program provides the district with greater independence and flexibility in how it actually spends its State funds, places additional responsibility on the school district to oversee its projects, and limits the oversight by the State. Each district is required to contribute to the funding of its projects provided the district is financially able. New Construction projects require a dollar for dollar (i.e., 50/50) district matching share requirement. Modernization projects require a 20 percent (i.e., 80/20) district matching share. Districts that are unable to provide local funding may be eligible for additional State funding for its share of the project. State funds for the SFP (new construction and modernization) are currently coming out of the Proposition 1A Bond Measure passed in November 1998; however, in the future State funding may be derived from any funding source made available to the SAB. A district is able to file separately for an eligibility determination and funding application with the completion of as few as four forms for the SFP. It is the goal of the OPSC to process applications for eligibility and funding grants that are deemed to be complete within 60 to 90 days for submittal to the SAB. These applications are presented chronologically for SAB approval.

## **New Construction Grant**

Eligibility for a 50/50 State funding grant is based on a district's need to house pupils. Education Code Section 17072.10 establishes a grant per unhoused pupil for new construction projects as follows:

- \$5,480 for each elementary school pupil
- \$5,796 for each middle school pupil
- \$7,587 for each high school pupil

These grants are intended to provide the State's share (i.e., 50 percent) for all necessary project costs with the exception of site acquisition, utilities, off-site and service-site development. The necessary project costs include, but are not limited to funding for design, the construction of the building, general-site development, education technology, unconventional energy, tests, inspections, and furniture/equipment. The exceptions above are reviewed, approved and funded in addition to the grants provided on the same share basis.

### **Modernization Grant**

Eligibility for an 80/20 percent State funding grant is based on a district's need to house pupils in an existing safe, well-maintained, and modern facility. In order to qualify for modernization, a permanent school facility must be a minimum of 25 years old. The qualifying age factor for relocatable buildings at least 20 years old. Education Code Section 17074.10 establishes a grant per pupil housed in buildings to be modernized as follows:

- \$2,367 for each elementary school pupil
- \$2,504 for each middle school pupil
- \$3,278 for each high school pupil

The modernization grant is intended to provide the State's share (i.e., 80 percent) for all necessary project costs.

The SAB annually (in January) adjusts the new construction and modernization grants to reflect construction cost changes as set forth in the statewide cost index for Class B construction as determined by the SAB. The above grant amounts have been adjusted accordingly.

### **State School Building Lease-Purchase Program**

For years the State School Building Lease-Purchase Program (SSBLPP) was the largest program administered by the OPSC. The SSBLPP is being phased out as it has been replaced by the SFP. Funding is still being provided to school districts for completion of new construction as well as modernization of on-going LPP projects. Many projects were transitioned from SSBLPP to SFP and were funded with Proposition 1A bonds. It will take two to three additional years before all the SSBLPP projects are completed and audited by the OPSC. If a district had a LPP project that was not completely funded by the SAB and which did not meet the transition requirements, the district may re-file the project under the provisions of the SFP with a stipulation that the SFP grants are offset for any previous apportionments made under the SSBLPP for that particular project.

The SSBLPP was funded through the sale of state general obligation bonds approved by the California electorate in past years. (See Source of Funding on page 51.)

## Deferred Maintenance Program

The Deferred Maintenance Program (DMP) provides funds on a dollar for dollar matching basis for the purpose of assisting school districts with expenditures for major repair or replacement of existing school building components. This program assists districts in meeting needs that do not fall within the normal requirements of the modernization program. Typically, the DMP includes repair or replacement of plumbing, heating, air conditioning, electrical systems, roofing, interior and exterior painting, floor systems and other maintenance projects approved by the SAB. The SAB is authorized to apportion to school districts an amount based on a district's average daily attendance, revenue limit, and budget. Each district must have an approved Five Year Deferred Maintenance Plan that identifies the district's deferred maintenance needs. If the district meets the criteria for a hardship apportionment, the State will fund up to 100 percent of the eligible costs above the district's annual match of the deferred maintenance hardship project. During Fiscal Year 1999-2000, the OPSC apportioned in excess of \$179 million for deferred maintenance needs in school districts. Sixty-one of these districts qualified for deferred maintenance hardship funding for a total amount in excess of \$24 million. Basic deferred maintenance apportionments exceeded \$155 million.

Funding for the DMP comes from excess repayments relating to the old State School Building Aid Program (1952 law), the State General Fund, and from unused site revenue. In 1999-2000, the SAB was able to fund up to 86.6 percent of matching district funds for needed and eligible deferred maintenance projects. It is anticipated that \$166 million will be available from Proposition 98 for the next fiscal year.

## State Relocatable Classroom Program

This program is designed to meet classroom needs for those districts impacted by excessive growth or unforeseen classroom needs by making relocatable classrooms available. All relocatable classrooms are available for lease at the annual rate of \$4,000. The SAB provides funds for the acquisition, installation, and relocation of these relocatable classroom facilities. The OPSC secures contracts with inspectors, architects and movers of relocatable classrooms for acquisition, delivery, and installation of the facilities.

### Relocatable Classroom Rent

Fiscal Year	Amounts in Millions
1998-1999	\$21.3
1999-2000	\$26.0*
Total	\$47.3

*\*This figure represents a combination of sales/rental income collected this Fiscal Year through June 30, 1999.*

Revenues from the rental and sale of relocatable classrooms collected from districts are retained by the SAB and are used to fund the acquisition, furnishing, delivery and installation of additional relocatable classrooms. This revenue stream enables the SAB to continue to approve the acquisition of relocatable classrooms for immediate classroom needs and replacement of those relocatable classrooms that have exceeded their useful life.

### Unused Site Program

The Unused Site Program became Law in 1974 and requires that districts and county superintendent of schools are subject to the fee for district properties that are *not used* for school purposes after a specific period of time.

The provisions of this program are governed by the Education Code (EC) Sections 17219 through 17224. In addition, the SAB has adopted regulations set forth in Title 2, Subgroup 10, *California Code of Regulations*, commencing with Sections 1864.1 through 1864.10 which effect the administration of this program.

**Table 6: Summary of School Sites Subject to Non-Use Payments**
